

Imagine sitting down for supper with your family after a hard days work and having it constantly interrupted by telemarketers! Imagine caring for a sick family member, or an emergency requireing the use of the phone immediately and having to waste precious minutes and seconds hanging up on a telemarketer when an ambulance is needed. Imagine having to stop everything your doing to answer the phone constantly through out the day just to say "No Thank you I'm not interested." I can't imagine life without the No Call List!!!! Please support passage of the Telephone Consumer Protection Act Docket - 02-278.
